To strengthen our EIT Team, we are looking for a highly motivated

Connectivity Support Engineer (f/m)

Key tasks

- Project Lead for connectivity, responsible for technical aspects of connectivity to, and integration with, third party devices and applications
- Deriving requirements for hardware and software connectivity modules in our monitor
- Creating and performing verification and validation test plans related to connectivity features
- Support for marketing and sales team as technical expert
- Technical sales support for distributors and customers

Our offer

- An opportunity to interact with leading medical device manufacturers
- Interesting and varied tasks and the opportunity to take on responsibility
- A focus on open and cooperative team-work and flat hierarchies

Your profile

- Academic background in technical sciences, preferably IT, software, or biomedical engineering
- Several years of experience in a technical environment
- Good understanding of standard communication and connectivity protocols
- Eager to learn and develop in a dynamic environment
- Strong communication skills, both oral and in written
- Fluent in English, conversational German

Keen on contributing to our growth? We look forward to getting to know you!
