We are looking for a

Verification/Validation Engineer (f/m)

Key tasks

- Responsible for the verification and validation of the development output on product/system level
- Conception and implementation of automated tests
- Setup and continuous improvement of the test environment
- Collaboration with external testlabs to organize and execute approval tests according to medical standards

Our offer

- Meaningful activity on products that enable a personalized therapy of patients
- Flat hierarchy, short decision-making processes, interdisciplinary collaboration
- Opportunity to contribute and develop your skills in an agile company

Your profile

- Bachelor's or Master's degree in medical engineering, electrical engineering, software engineering
- Previous experience in product and/or software testing, preferably in a regulated industry
- Structured and conscientious way of working
- Good communication skills in English, both spoken and written

We are looking forward to get in touch with you! Please send your application documents to jobs@sentec.com.
