

### **Our Purpose & Who We Are:**

At Sentec we aim to improve the lives of patients by advancing respiratory monitoring solutions to provide clinicians the continuous insight they need to guide care and – most importantly – improve patient outcomes.

### **Our Values:**

Patient Focus  
Collaboration  
Integrity  
Quality

### **Job Description: Clinical Education Specialist**

The growing clinical education team is looking for a Rhode Island team member with clinical experience, and a passion for educating members of the respiratory care and nursing community, to join our in-office team at our US headquarters in Rhode Island.

This person will play a large part in creating content used in clinical education, training, marketing and sales processes. Clinical experience is critical to create content for the best-practice and clinical use case of Sentec technology.

This role is cross functional, and will work with members of the marketing team, clinical application team, and end-users of Sentec products. Presenting and public speaking skills are required to educate the public about the clinical value of Sentec.

This is an in-office position.

To apply please send a resume and cover letter to Liza at <mailto:jobs.us@sentec.com>

### **Essential Duties and Responsibilities:**

- Clinical content development for marketing, training, and customer education
- Key-Opinion-Leader outreach and recruitment
- Build on best practices to drive clinical success.
- Deliver quality clinical and product training to illustrate the benefits of Sentec technology and product solutions.
- Drive a high level of device competency to the sales team as well as end-users.
- Participate in routine and specialty educational programs, continuing education webinars, Regional or National Training Events and Conferences.
- Summarize and synthesize research and publications about Sentec technologies and products  
Position key publications and best practices to influence clinicians to successfully adopt and use Sentec in key markets

**Qualifications/ Education:**

- Bachelor's Degree or similar level of education in nursing, respiratory, or medical field.
- 2+ years of experience in hospital NICU/ICU
- Experience training/educating healthcare professionals.
- Effective verbal and written communication skills to include effective communication with senior clinicians and key decision-makers.
