Company Video

## Position

### Internship in mechanical engineering – from design to assembly (f/m)

Help us design and assemble our next generation sensor or consumable prototypes! If you enjoy manipulating and assembling components in the lower millimeter to micrometer range, apply for an internship at Sentec. Depending on your interests and experience, you can assist in designing modules/tools or work under the microscope to assemble prototypes.

## Key tasks

- Assemble components for sensor prototypes or aid in the design of new modules or tools
- Assist in characterization of prototypes
- Bring your thoughts and ideas to the rest of the sensor development team to help us solve problems and bring new products to the market

## Our offer

- Meaningful activity developing products that support the therapy of patients
- Flat hierarchy, short decision-making processes, interdisciplinary collaboration
- Opportunity to contribute and develop your skills in an agile company

## Your profile

- Bachelor student or degree in a technical / scientific field
- Experience with basic mechanical concepts
- Experience with CAD
- Very good command of English (spoken and written). Conversational German is a plus
- Determined to draw insights from data and develop new solutions

We are looking forward to get in touch with you! Please send your complete application documents to [jobs@sentec.com](mailto:jobs@sentec.com).
