Company Video

Position

Internship in sensor/consumable development – hypothesis formulation, testing, data interpretation (f/m)

Sentec sensors works with a variety of sensing technologies from electrochemical to optical. We are dedicated to improving our existing products and developing new ones – here we need to help to understand how the changes we make impact performance. Join us in characterizing prototypes, drawing conclusions from the data, and proposing strategies to improve sensor performance in the next design loop.

Key tasks

- Characterize sensor or consumable prototypes
- Collect and analyze data, and present findings to rest of the team
- Bring your own ideas to the table on how we can improve our current designs

Our offer

- Meaningful activity on products that support the therapy of patients
- Flat hierarchy, short decision-making processes, interdisciplinary collaboration
- Opportunity to contribute and develop your skills in an agile company

Your profile

- Bachelor student or degree in a technical / scientific field
- Ambitious to understand our systems on a detailed level
- Prepared to help out in variety of tasks ranging from lab work to complex data analysis
- Very good command of English (spoken and written). Conversational German is a plus
- Determined to draw insights from data and develop new solutions

We are looking forward to get in touch with you! Please send your complete application documents to jobs@sentec.com.
