

Sentec is a market leader of non-invasive respiratory monitoring solutions who develops, manufactures, and markets patient-centric, cost-effective technologies and products that provide clinicians with greater insight to quickly identify trends, rapidly and more accurately assess patient respiratory status, and make more well-informed, timely care decisions – decisions that can improve patient care. We aim to improve the lives of patients by advancing non-invasive patient care by empowering clinicians with clinically superior monitoring and therapeutic technologies.

We are seeking a qualified Supply Chain Manager at our recently acquired Percussionaire facility located in Sandpoint, ID.

Summary:

The Supply Chain Manager coordinates, organizes, and oversees all activities involved in the identification, acquisition, production, and distribution of company goods.

Essential Duties and Responsibilities:

- Lead the procurement and inventory teams to ensure supply continuity, quality and pricing. Maintain supplier evaluations. Enable on-time production orders.
- Ensure components and finished goods inventory levels that meet deliverability requirements and low capital commitment in the short and long term.
- Responsible for smooth and cost-optimized shipment of products to direct customers and distributors.
- Create and maintain procurement master data on the MRP system. Manage orders and delivery processes.
- Create reporting of relevant metrics to measure SCM performance.
- Lead strategic projects and initiatives to ensure efficient and effective execution of the above core responsibilities.
- Enforce compliance of legal and safety regulations.

Supervisory Responsibilities:

- Responsible for staffing, supervision, and performance management of department employees to include disciplinary action.
- Checks employees' timecards for errors and corrections
- Participates in staff management training and effectively manage employees in compliance with federal and state employment laws and regulations.
- Interview, hire, and train new department employees.
- Conduct timely performance reviews, establish clear goals, and support learning opportunities for job skills and career growth.

Qualifications and Education:

- Bachelor's Degree in business, management or other related discipline or equivalent work experience required.
- 3-5 years progressive experience in management of materials and sourcing within a design and manufacturing environment desired.
- Experience in lean manufacturing, total quality, six sigma, or other similar environments.
- Working knowledge and understanding of ERP/MRP systems and their use in a manufacturing environment.
- Proficiency in Microsoft Office, including Word, Excel, PowerPoint, and Access.
- Supervisory experience.
- Excellent verbal and written communication skills.
- Excellent interpersonal and negotiation skills with a proven ability to create and maintain positive working relationships with vendors, suppliers, shippers and customers.
