Assembly Technician

To realize further innovations in the served medical field, we are looking to add Assembly Technicians to our manufacturing team.

Key Tasks:

- Assemble Medical Devices and breathing circuits
- Work independently or within a team
- Attention to detail

Our Offer:

- Work in a growing company environment
- Directly influence the quality of products and make a difference for patients worldwide
- Collaborate in a small international team with experienced Research and Development Teams
- Opportunities for professional and personal growth

Your Profile:

- Solution minded individual not afraid to ask questions and challenge the status quo
- Ability to adapt to changing priority
- Positive attitude and willingness to learn
- Analytical mindset, strong attention to detail, ability to influence positive change through collaborative efforts.

Would be great to meet you and to explore whether your plans and ideas may be concurrent with ours!
