Director of Quality

To realize further innovations in the served medical field, we are looking to add a Director of Quality.

Key Tasks:

- Lead our Quality department
- Work alongside Manufacturing to develop, and administer quality procedures
- Manage vendor qualifications, incoming goods inspections, CAPA and non-conformity processes.
- Work cross-functionally to develop new procedures and processes to improve the quality of our products.

Our Offer:

- Work in a growing company environment
- Directly influence the quality of products and make a difference for patients worldwide
- Collaborate in a small international team with experienced Research and Development Teams
- Opportunities for professional and personal growth

Your Profile:

- Bachelors' degree or equivalent work experience required
- 3+ years' experience working in Quality in a highly regulated industry
- 1+ years of supervisory experience
- Analytical mindset, strong attention to detail, ability to influence positive change through collaborative efforts.

Would be great to meet you and to explore whether your plans and ideas may be concurrent with ours!

You can call us or contact us remotely at milissa.jones@sentec.com
