Quality Control Technician

To realize further innovations in the served medical field, we are looking to add Quality Control Technician.

Key Tasks:

- Inspect components, assemblies and finished goods according to inspection criteria
- Verify production documentation for completeness and accuracy
- Initiate nonconformances

Our Offer:

- Work in a growing company environment
- Directly influence the quality of products and make a difference for patients worldwide
- Collaborate in a small international team with experienced Research Development Teams
- Opportunities for professional and personal growth

Your Profile:

- Solution minded individual not afraid to ask questions and challenge the status quo
- Ability to adapt to changing priority
- Detail oriented and able to identify nonconforming product
- Able to communicate clearly in written and oral communication

Would be great to meet you and to explore whether your plans and ideas may be concurrent with ours!
You can call us or contact us remotely at milissa.jones@sentec.com
